

Dani Zaghian

Full-stack web developer and designer crafting applications that are highly functional, memorable, and beautiful. Quick to learn and even faster with a bad pun!

EXPERIENCE

Full-stack web developer and lead instructor

Actualize

January 2017 - current in San Francisco, CA

Lead instructor and curriculum developer in San Francisco for the Actualize web development programming bootcamp. Instruction covers technologies such as Ruby, Rails, git, JavaScript, Vue, SQL, Postgres, as well as project planning, career coaching, and management.

Front-end web developer and UI/UX designer

Terrace Consulting

April 2016 - December 2016 in San Francisco, CA

Worked as a consultant on many teams to create applications for clients using a variety of technology stacks. When required, I designed parts or all of web applications. Project managed and worked one on one with large clients to create, implement, and iteratively revise software solutions.

Full-stack web developer and designer

General Assembly

Sep. 2015 - Dec 2016 in San Francisco, CA

Taught web development principles, computer science, programming languages, and libraries/frameworks, focusing on MEAN stack and Ruby on Rails. Designed and built full-stack fully functional applications with working knowledge of many languages, libraries, frameworks and web development processes. Created and led algorithm/whiteboard interview prep sessions for students and recent alumni.

Social media manager

Vulcun

March 2015 - July 2015 in San Francisco, CA

Managed all Social Media accounts (Facebook, Twitter, Reddit, Wordpress, Blog). Worked cross functionally with Business Development, UA, and Marketing teams to develop and test promotions, boost SEO, and acquire users. Hosted a live daily broadcast.
