

Dani Zaghian

Full-stack web developer and designer crafting applications that are highly functional, memorable, and beautiful. Motivated by growth mindset and passionate about learning.

EXPERIENCE

Head of Live; Web Development

Podium Education

March 2022 - current in San Francisco, CA

Developing, delivering, and instructing the undergraduate web development experience. Includes project, product, and people management.

Senior Instructor and Director of DEI

Actualize

January 2017 - March 2022 in San Francisco, CA

Lead instructor and curriculum developer for the Actualize web development programming bootcamp. Developed a 12 week deliberate-practice curriculum used by students to solidify programming concepts and syntax. Instruction covers technologies such as Ruby, Rails, git, Github, JavaScript, Vue, SQL, Postgres, as well as project planning, career coaching, and management. Led partnership initiatives to create more diverse classrooms and advocated for inclusion in tech.

Front-end web developer and UI/UX designer

Terrace Consulting

April 2016 - December 2016 in San Francisco, CA

Worked as a consultant on many teams to create applications for clients using a variety of technology stacks. When required, I designed parts or all of web applications. Project managed and worked one on one with large clients to create, implement, and iteratively revise software solutions.

Full-stack web developer and instructor

General Assembly

Sep. 2015 - Dec 2016 in San Francisco, CA

Taught web development principles, computer science, programming languages, and libraries/frameworks, focusing on MEAN stack and Ruby on Rails. Designed and built full-stack fully functional applications with working knowledge of many languages, libraries, frameworks and web development processes. Created and led algorithm/whiteboard interview prep sessions for students and recent alumni.
